

MALARIAL POISONING

Loss of Blood-Corpuscles Resulting from an Attack of the Fever Must Be Replaced Before Health Will Be Restored.

The important thing in the treatment of malarial poisoning is to overcome the anemic or bloodless condition in which the fever leaves the patient. For the attack itself the one recognized remedy is quinine but, until the great destruction of the red blood-corpuscles has been repaired by a blood-making tonic, the sufferer will continue to be subject to fevers, chills and general ill health. Without proper treatment this condition may last for years.

It is because of this power to increase the number of red blood-corpuscles that Dr. Williams' Pink Pills are so invaluable in the treatment of the after-effects of malaria, grip, fevers and wasting diseases. As the blood becomes pure and red, it carries nourishment and strength to every part of the body until the health is completely restored.

Mrs. J. W. Lindsay, of No. 430 South 28th street, Paris, Texas, describes her cure by this remedy, as follows:

"My health was very much run down for nearly four years as a result of overwork. Nearly all of the first year of my sickness I was confined to bed. I was troubled with chills which would last for half a day at a time. I had no color at all and felt tired out and weak. I lost about twenty pounds in weight."

"I was treated for a long time by a doctor but did not get much relief. Finally after I had been sick for three years and was unable to do anything, I decided to try Dr. Williams' Pink Pills. The pills soon helped me. I gained in flesh and, in less than two months' time, was able to do my work. My friends were so surprised at my gain in health that they would ask me what I had been taking. It has always been a pleasure to recommend Dr. Williams' Pink Pills."

If you are suffering from anemia, rheumatism, lumbago, or any disease arising from impure blood, send a postal card request today for a copy of our free booklet, "Diseases of the Blood."

Dr. Williams' Pink Pills are sold by all druggists, or sent, postpaid, on receipt of price, 50 cents per box; six boxes for \$3.00, by the Dr. Williams Medicine Company, Schenectady, N. Y.

of happiness is due
to candy Cascarets.

Millions keep them in their pockets to dispel the blues. For nearly all unhappy days are due to bowel clogging. A single tablet, promptly taken, alters everything at once.

Vent-pocket box, 10 cents—at drug-stores. People now use a million boxes monthly.

REAL LIVE GHOST.

People at Herington Are Really "Seein' Things at Night."

Declare That Form of Wealthy Man Appears at Dark.

HE SMOKES HIS PIPE.

Sits on Front Porch and Terrifies Entire Neighborhood.

Other Items of Interest in Kansas Towns and Cities.

Herington, Kan., March 22.—That the ghost like form of C. Borbach, formerly a wealthy man of this city, is appearing every evening at sundown on the front porch of the house in which he died, is the sworn opinion of practically every citizen living in the west end of Herington.

The ghost scare has become so general that the neighbors in the vicinity of the house are living in their homes in horror and the vast traffic that once came in over West Walnut street has been shifted to other streets in the city—the house, the neighborhood and this part of the city is shunned.

It is said that a white form, representing in every detail the profile and features of the late Mr. Borbach, appears on the front porch of his former home. The house is an odd affair—the front porch topped with a huge house like tower. The house itself is built in ghostly detail and in its situation upon the brow of a steep hill, it has caused consternation among the people of the city.

At his death Mr. Borbach was one of the healthy citizens of Herington. He came here in the early days when the Rock Island and the Missouri Pacific first built through the city. He bought up considerable land at that time and when the Rock Island established their large terminals in this city his property was turned into a fortune.

Last summer Mr. Borbach died. He owned at that time many houses over the city and was considered wealthy. He lived in a small but most queer house on the brow of the Walnut street hill and for many years was a well known figure in this part of the city. He spent all of his time in the weather on the front porch of the house smoking a large old style pipe. His position on this porch, the smoking of the pipe and the general surroundings gave the place a distinctive touch—and the touch still remains.

The house has been vacant most of the time since the death of the old man. His sons have tried to live in it but they declare openly that in the night they hear noises, then a scratch of a match, a light and the door to the front porch will open as the ghost of the old man walks to his customary seat, lights his pipe and smokes.

All who have lived in the house make the same statements and the place is known as the "Retreat of the Borbach Ghost." People who have passed the house during the night claim to have seen him on the porch. Peter Popp, general foreman of the Hagley lumber interests in this city, and a sane business man declares that he has seen the ghost of the old family figure on the porch many times. During the present moonlight nights many reports of the ghost have been given.

Walnut street to the west from Herington is the main thoroughfare between this city and the small town of Topeka. The roads leading to the street have been placed in excellent condition for automobile purposes and the street is the busiest of the city during the pleasant evenings. However, since the recent ghost scare it is said that even the automobilists dare not run their cars past the haunted house, fearing that their machines will break down at this point and they will find it necessary to stop and make repairs.

It is a peculiar set of circumstances for a city of 5,000 people to fall into the belief that a ghost is prevalent and is firmly believed. Those who refuse to believe in the ghost theory at night and prove their theories and thus the scare grows each day—and night.

TO ORGANIZE FAIR ASSOCIATION.
Oakley Business Men Get Together and Form Committee.

Oakley, Kan., March 22.—Draw a circle about Oakley for 25 miles in any direction and the line will touch four county seats, as follows: Hoxie, Sheridan county; Gove City, Gove county; Russell Springs, Logan county; and Coey, Thomas county. This fact has prompted the public spirited business men of Oakley, and the prosperous farmers tributary to this place to organize a fair association, which will be named the Inter-County Fair Association of Oakley. The Gove county line is two miles from Oakley, the Logan county line corners with Logan county, and the Sheridan county line is eight miles from here. At the first meeting of the projectors of the fair, a large number of representative citizens and business men was present, a temporary organization was effected, and L. L. Moore was chosen president, and T. A. Spencer, secretary. A committee of three was also elected, as follows: T. P. Ham, Dr. C. M. Miller and J. R. Young, who will draw up the constitution and by-laws. The people of Oakley are enthusiastic for the enterprise, and no doubt the border counties will fall into line. The temporary fair association is a young business men, and full of pride and pluck for the town, and for every enterprise that will enhance the farmer as well as business interests.

A COURSE FOR DRUG CLERKS.
That Is Among the New Features of the University.

Lawrence, Kan., March 22.—A course planned especially for the drug clerks in Kansas who do not have the opportunity for regular college training is among the new features announced for the next summer session of the University of Kansas, catalogues of which are now being mailed out by the registrar of that school.

ONE EGG WITHIN AN EGG.
White in One Shell, Yolk Inside in Another.

Chanute, Kan., March 22.—Henry Ebert of 110 North Lafayette avenue has a hen that laid two eggs at one time, and more than that, one egg was within the other. The outside egg looked perfect and was about the size of a goose egg, but when it was broken

another perfect egg was discovered inside of it. The inside egg was about the size of an ordinary egg. The outer egg contained only the albumen, or white, while the inner egg was composed mostly of yolk, with only a thin layer of white surrounding it.

SUNDAY AT WAKEENEY.
Spilled Churches and Shade Trees Great Attractions.

Wakeeney, Kan., March 22.—To spend Sunday in this place, where the visitor will find the choicest of the five churches to attend, and where he will see thousands of shade trees growing where only a few years ago it was a treeless prairie, is a source of gratification to the many commercial men who run to Wakeeney to spend Sunday. As one of her representatives business men truly says: Five churches grace the town, Methodist, Presbyterian, Baptist, German Lutheran and Episcopal. All of them have a large and growing membership and good church properties.

Wakeeney is the county seat of Trego county. As the county is enjoying a substantial boom in the prices the farmers are getting for their surplus products and the steady increase in her farm lands, so is Wakeeney keeping up a good pace in gain of property. The town is a well planned city, with a fine high school, located here, is the pride of every citizen who has any pride whatever in educational affairs. It ranks high among the educational institutions of the state. It has an enrollment of over 100 young people, and the graduating class this year numbers 17.

The Wakeeney ladies keep social affairs stirring. Two clubs are sustained, the Tourist and Locust social clubs, their membership is limited. Neither belong to the state federation, but if one asks why the members of either club will not attempt to answer the query.

A number of autos are owned in Wakeeney, besides many farmers have made so much money out of their farm products they, too, are buying them.

The court house yard will be sown to blue grass this spring. It also has a thrifty lot of trees growing nicely. The waterworks and electric light plants are both owned by the city. The Union Pacific pays the city a nice little revenue of about \$100 a month for water. The waterworks have just been completed, while the electric lighting plant will soon be in operation. A few buildings are taking both water and light for a starter.

In the residence part of Wakeeney no less than \$25,000 was expended for new buildings last year. The modern homes of E. C. Wolcott, of cost of \$4,000 and that of Herman Long, costing \$5,000, together with several others, are the result of the year 1909. While the prospects for 1910 in buildings will largely exceed these figures. One of the big improvements this year will be the erection of a house of E. C. Wolcott, of cost of \$10,000 with a frontage of 125 feet and 75 feet deep. It will be two story with a public hall 45 feet front and 85 feet deep.

The present member of the legislature from Trego county is J. J. Keras. He came to Trego county in 1881, and took up a homestead. In 1898 he embarked in the hardware and implement trade, and has built up a big business. He is public spirited in all affairs for the upbuilding of Wakeeney. As a member of the state legislature he was active for the interests of his constituents and Trego county.

Wakeeney will grow. It is so situated the place can't help it. Surrounded by as magnificent and fertile a country as one will find in this part of the state, and where the farmers are making money faster than the business men, and a beautiful progressive seat of government with a fine court house paid for, and every family beautifying their homes with blue grass lawns and growing and improving with the right kind of people to forge ahead in all public enterprises, Wakeeney can't help growing.

GARDEN SPOT AT FORT RILEY.
Big Force of Men at Work Fixing Up Grounds.

Junction City, Kan., March 22.—Fort Riley this year will be one of the garden spots of the state and work has been going on for several months to get the grounds in shape for the grass growing. A large gang of men have been at work and at present are grading, there are perhaps 40 men giving the grounds a general overhauling. Graders have been at work and many of the rough spots have been cut down and graded and the general appearance of the place will be greatly improved.

assaulting a 14-year old girl, are the defendants in the case.

On account of the alleged bias and prejudices of the people of Trego county against the defendants, the court granted the application.

The charges against the four young men are of a most sensational and scandalous nature.

FROM IOWA TO KANSAS.
Clarence Edwards Invests Largely in Ness County Property.

Ness City, Kan., March 22.—The following is from an Iowa paper: Clarence Edwards, who has been in Ness county for some time, and son Donald have gone west. It is not now as we measure distances, like in Greeley's time, but west nevertheless. They left Moulton Sunday evening and the next evening were at their destination, Ness county, Kansas. The trip in Greeley's day would have been made laboriously in two weeks, granted no bad holes interfered.

Mr. Edwards knows his business. He is a pusher, a hustler and a jolly good fellow. While engaging in the stock business his buying and selling frequently ran up to \$150,000 to \$180,000 annually. He got the habit from W. H. Seaman, of Deep River, Iowa county, at \$80 per acre, and later took up the real estate trade. He is well adapted for the line of business, knowing the value of lands and what soils are adapted to certain cereals. He has invested largely in Ness county, Kansas, lands and proposes to stay here. His lands are in Iowa are numbered by the acre and all feel that with Mr. Edwards' pushing nature he will make good in the land of wheat, alfalfa and sunflowers.

LESSONS IN MEAT CUTTING.
Agriculture College Will Give Series of Meat Demonstrations.

Manhattan, Kan., March 22.—The majority of housewives of the country do not know where a choice piece of meat comes from or how it is cut. The Agricultural College of the department of the Agricultural college intends that this defect shall be remedied in the future generations and to that end he has arranged a series of meat demonstrations to be given before the junior and senior domestic science girls of the college.

These demonstrations deal with the proper cutting and preparation of the different cuts of meat. These demonstrations are made by Professor Peterson of the animal husbandry department, who has made quite a study of this line of work in Minnesota under one of the leading meat cutters in the United States.

Lectures and demonstrations have been given on pork, mutton and beef. The girls have had considerable theory on the subjects of meats and by the aid of these demonstrations they ought to be able to buy meat intelligently when the time comes for them to do it. Incidentally it might be added that these girls have been thoroughly trained to cook this meat.

PULP MILL FOR GARDEN CITY.
Contract Has Been Let and Will Cost \$200,000.

Garden City, Kan., March 22.—Garden City is to have this year, a mill for the production of beet pulp, to cost \$200,000.

This institution is to be built by the United States Sugar & Land company, and the contract has already been let. The location of the plant will be just north of the sugar mill and west of the Garden City, Gulf & Northern roundhouse.

The plant is for steam drying the pulp, removing the organic and deleterious acid quality, and rendering it of important use as a dairy product. The contract is let to the Larome-Valley company of Detroit, Michigan. The plant is to have a capacity of 1,000 tons a day.

General Manager Gillespie of the sugar company says the company will be able to make from five to six per cent in the weight of the beets sliced in consequence of this move.

The pulp is to be sold all over the United States for dairy cattle. It is the first plant of its kind west of the Mississippi river.

OWNING THEIR OWN PLANTS.
Oakley and Lincoln Will Vote Bonds Soon for City Water.

Salina, Kan., March 22.—The people of Oakley, Logan county, will vote April 5 on a proposition to issue bonds for \$40,000 to build a city water and electric light plant. Business men of Oakley say the proposition will carry by a large majority.

In the last few years nearly every town in the central and western part of the state has voted on such a proposition and almost invariably bonds were voted. Lucas and Plainville are now building plants that are well under way and other towns have voted on the proposition. This is said not to be one plant in western Kansas that is owned by private interest.

Lincoln will vote March 24 on a proposition to issue \$12,000 bonds to buy a new engine for the city water and light plant. The town is in total darkness and has been for several weeks because of a defective engine.

MCPHERSON BOY IN CHICAGO.
A. D. Van Nordstrand on Committee of Columbia Yacht Club.

Mpferson, Kan., March 22.—The Chicago Tribune has a long article on the yacht races that will be held this year under the auspices of the Columbia Yacht club. The big event will be a long distance race, second week in July and the president of the club appointed a committee of three to arrange details for the week, one member being A. D. Van Nordstrand, son of J. M. Van Nordstrand of this city.

PAID \$120 AN ACRE FOR LAND.
Samuel Slayton Bought Quarter Section at Record Price.

Wellington, Kan., March 22.—The highest price ever paid for land in Sumner county was recorded today in the sale of the J. E. Ruzick quarter section adjoining Wellington on the southwest. The price was \$19,000, about \$120 an acre.

The land is in the Slate Creek valley. It was bought by Samuel Slayton, a young farmer of Mayfield.

THE GROUND SQUIRREL.
J. B. Hoyt Says It Destroys Millions of Cut Worms.

Lincoln, Kan., March 22.—The ground squirrel is a blessing, J. B. Hoyt is authority for this statement. It is commonly supposed that this animal is a detriment, but Mr. Hoyt says that the ground squirrel destroys millions of cut worms annually and we all know what damage they do to our corn fields.

Mr. Hoyt says that it is a great mistake to kill a ground squirrel as in doing so, you are killing one of your best friends.

DESTROY CHINCH BUGS NOW.
Ninety Per Cent Will Be Killed If Grass Is Burned.

Lawrence, Kan., March 22.—Hit the chinch bugs hard for the next two weeks, is the advice of Prof. E. A. Glenn of the entomology department of Kansas University, who has been working on the problem of controlling the pests for the last few months.

"The chinch bugs are just now coming up out of the roots of the grass," Professor Glenn said today, "and now is the time for the farmers to exterminate them. The next few weeks may determine whether we have bugs in dangerous quantities this year or not."

"It is easier to destroy the bug now than to try to fight their offspring a few months later. Burning the grass in the waste corners and meadows at this time will kill nearly 90 per cent of the bugs, if the burning is done in the afternoon when the bugs are up out of the ground. An actual count in Kingman county last week from afternoon burning, showed that 87 per cent of the bugs were destroyed."

FARM HANDS SCARCE.
They Want Big Wages and Horse and Buggy Kept.

Douglas, Kan., March 22.—"It is almost impossible for us to get hired help any more," complains a Pottawatomie county farmer. "In my section we are paying from \$35 to \$45 a month for hired men, and we must give them the privilege of keeping a horse and buggy at our expense. If we have no buggy shed we must build one for them. Whenever they take a notion to lay off or make a trip they lay out the work for us to do during their absence. I guess the solution is for the farmer to put in the crops they can tend themselves and let the rest of their land go back to pasture."

VETERAN DEAD AT AGE OF 85.
J. K. Fisher Was at One Time Revenue Collector for Kansas.

Atchison, Kan., March 22.—Captain J. K. Fisher, a prominent veteran of the civil war, died here yesterday at the age of 85 years. At the outbreak of the war Fisher sold his business in Uniontown, Pa., and organized a band of soldiers that became the first squadron of the Sixth Pennsylvania cavalry. Later he served as an internal revenue inspector for Kansas and Nebraska. He was once a state senator.

SMOTHERED TO DEATH.
Infant Son of Mrs. Cline Became Fastened in a Go-cart.

Atchison, Kan., March 22.—The infant son of Mr. and Mrs. Charles Cline of Potter was smothered to death in a go-cart yesterday. While his mother was busy with her household work the baby's head became fastened between the cart strap and the pillow. While in this helpless state his face was buried in the pillow.

CEMETERY FOR PREACHERS.
Methodists Form Society and Will Have One of Their Own.

Wichita, Kan., March 22.—The preachers of the Southwest Kansas Methodist conference have formed a society which will purchase a cemetery in the district where the preachers and their wives may be buried. The preachers' funeral expenses to be paid by the association which will also assist needy preachers and their families.

JUDGE REES' SUCCESSOR.
He Will Be Appointed by Governor Stubbs This Spring.

Salina, Kan., March 22.—Judge Rees has adjourned district court until May 23, at which time a new judge of the thirtieth judicial district of Kansas will have been appointed by Governor Stubbs to succeed Judge Rees. The jury was excused until May 23.

JUST FROM HOLLAND.
One Hundred Immigrants Bound for Minnesota in Special Train.

New York, March 22.—One of the most remarkable parties of immigrants that ever came to this country arrived yesterday on the liner Lapland, and today is speeding west in a special train for their future home in Minnesota. There are some 100 of these sturdy Dutch, men, women and children, well supplied with money, and traveling in luxury in two Pullmans, a smoking car, a diner and a baggage car.

The exodus of Hollanders is said to be the result of a plan originated by Bishop James McGolrick of Duluth. Each family has engaged a tract of land in Ottertall county, Minnesota. They will be the nucleus of a larger colony which will be established in the same district during the next few years.

Long Hat Pins Must Go.
Chicago, March 22.—It is now a misdemeanor for any woman to wear a long hat pin in public places in Chicago. Any woman caught wearing one is liable to arrest and a fine of \$50. After a month's discussion the city council by a vote of 68 to 2 passed the "anti-hat pin" ordinance.

Save This Recipe for Cough Syrup. It's Splendid.
You can make this unequalled cough syrup at home in five minutes, and you will find it a very handy household remedy. A few doses usually cure the deepest-seated cough. This recipe makes a full pint for only 54 cents, and lasts a whole family a long time. Tastes good too. There is nothing better at any price.

Take a pint of granulated sugar, add half a pint of warm water and stir for about two minutes. Put 2 1/2 oz. Pinex in a pint bottle and fill up with the sugar syrup. Take a teaspoonful every one, two or three hours.

You will also find this simple remedy excellent for whooping cough, bronchitis, hoarseness, chest pains, etc.

This recipe will not work with any of the weaker pine preparations. Use the real Pinex itself. It is a concentrated compound of Norway White Pine Extract. Your druggist has it, or can easily get it for you.

Strained honey can be used instead of the syrup, and makes a very fine honey and pine tar cough syrup.

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of

and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.
